

Hosam (Sam) Dahrooge

Software Engineer

(403) 470-0093 | sam.dahrooge@outlook.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Software Engineer specializing in frontend development with over 3 years of experience building enterprise applications. Delivered features used by up to 300,000 global users, improving onboarding, analytics, and engineering workflows. Focused on building reliable, maintainable and polished UIs in TypeScript and modern frontend frameworks.

Experience

Senior Frontend Software Engineer — Penny AI

Oct 2023 - Sep 2024

- **Designed, led, and built** onboarding and bulk-invite features, facilitating client acquisition with **over 70,000 users**.
- **Collaborated** on comprehensive analytics features, **increasing platform sales by 45%**.
- **Implemented** customizable dashboard and leaderboard features that attracted **eight enterprise clients**.
- **Established** design system patterns and **refined** projects, **reducing development time and UI inconsistencies**.
- **Coordinated weekly releases** of three applications across three platforms (iOS, Android, Web).
- **Guided a team of FE contractors**, ensuring quality deliverables and adherence to project timelines.

Frontend Software Engineer — Penny AI

Jun 2021 - Sep 2023

- **Led the FE development** for Penny's largest project, resulting in the **renewal of a multi-million dollar contract**.
- **Collaborated on a Chrome extension** for contact migration, **boosting user retention by 30%**.
- **Implemented tools and patterns** that streamlined feature management and scalability for enterprise clients.

Sample Fabrication Team Lead — Tierra Sol

Oct 2018 - Jan 2021

- Led a team from a major branch backlog to becoming the **centralized production department** across all of Canada.

Project

Playward — Game backlog manager and price tracker ([App](#) | [GitHub](#))

- Full-stack Next.js PWA in TypeScript, backed by PostgreSQL (Prisma) with Google auth, deployed on Vercel.
- **Aggregated pricing** across Steam, PlayStation and Nintendo using cron jobs and price caching.
- IGDB-backed **fuzzy search** with a **custom ranking algorithm** and recommendation shelves.
- App-like responsiveness with a **custom client routing** layer and **scroll restoration**.
- Service Worker **boot and asset caching**.

Skills

- **Frontend (Professional):** TypeScript, JavaScript, Angular, State Management (NgRx), RxJS, Ionic, Jest
- **Frontend (Additional):** React, Next.js, Tailwind
- **Backend:** Node.js, Prisma, PostgreSQL, Python, Django
- **Engineering:** Design Systems, i18n, CI/CD, Accessibility, Performance, Sentry/Datadog, Mobile (iOS/Android)

Education

- **Lighthouse Labs** — Diploma in Web Development (2021)
- **University of Calgary** — Majored in Oil and Gas Engineering (2014 - 2018)
